Professional Summary

Detail-oriented and analytical QA Manual Engineer with over 3 years of experience testing both web and mobile applications. Proficient in writing and executing test cases, conducting regression and exploratory testing, and performing API validation with Postman and Swagger. Experienced with Jira and Zephyr for structured bug reporting and test management. Contributed to successful product releases for platforms like Delek Homes (real estate website) and PlayBall (match organization mobile app). Currently enhancing automation skills in a collaborative Agile team setup.

Core Skills

- Manual Testing (Web & Mobile)

- Test Case Design & Execution (Zephyr)

- Regression & Exploratory Testing

- API Testing (Postman, Swagger)

- Bug Reporting (Jira)

- Functional & UI Testing

- Agile Methodologies (Sprints, Standups)

- Team Collaboration & Communication

- Basic Git, VS Code, Automation Stack Setup

Projects

PlayBall App – Mobile QA

- Tested authentication, match creation (POST), and statistics endpoints (GET)

- Used Swagger UI for API validation and checking JSON responses

- Reported bugs like incorrect 500 error instead of 401 for missing tokens

- Covered post-match flow: statistics entry, organizer rating, and visibility rules

Delek Homes – Web QA

- Verified property listing features, agent interactions, and inquiry forms

- Performed UI/UX validation on multiple browsers

- Reported form validation bugs and user experience issues to developers

---

Training & Education

- QA Automation Course (2025 – ongoing): Working in Agile sprints, Git + Node setup

- Manual QA Training: Test design, STLC, bug lifecycle, API testing on real projects
